

EDAC Group Website

A completely new website has been launched by the EDAC Group at:

www.edac.net

The new site incorporates many new features with great customer benefits including:

- 3-dimensional drawing file downloads of customer-build Edac part numbers from a wide range of core products in the Card-Edge, Rack & panel and press-fit Card-Edge ranges.
- Stock Check; a facility that allows customers to search North American or European distributors that are holding current inventory of Edac part numbers.
- A high-quality front-page graphic interface that illustrates common applications for the Edac connector range
