Electronica 2010

Another very busy Electronica for EDAC:

The biennial Munich exhibition provided a great showcase for the new product introductions launched recently by EDAC.

The Company also identified a number of new Distribution partners with interest in representing EDAC in several European and middle-east locations.

According to the organisers the 2010 exhibition saw over 70,000 visitors from around the globe with 2,600 participating exhibitors filling the numerous show halls. Around 50% of visitors and exhibitors came from outside Germany.
