EDAC appoints new Italian distributor

Edac (Europe) is delighted to announce the appointment of B.C.E. S.r.l. as an official distributor for its connector product range in Italy.

A long-established business, founded in 1992, B.C.E. has a strong reputation for providing excellent technical support to its customers as well as providing access to a comprehensive and competitive range of electronics components from industry-leading manufacturers.

B.C.E. is based at Sassuolo, near Bologna, and has representatives covering the whole of Italy. Further information is available on-line at www.bce.it

Commenting on the new appointment, EDAC (Europe) Managing Director, Andy King, said; "We are delighted to have B.C.E. join our existing family of distribution partners in Europe. They have a very good name in our industry for providing first class service to the market and great technical support to designers and engineers".

"We welcome the opportunity to expand our presence in Italy through B.C.E. It is the fourth largest economy in the EU and, although we already have excellent local partners working with us, the appointment of B.C.E. gives us even greater reach than has hitherto been the case".

Ends.
